Special Precautions and Warnings for the Use of Active Hexose Correlation Compound

What is Active Hexose Correlated Compound?

Active Hexose Correlated Compound (Active Hexose Correlated Compound) is a natural compound containing alpha-glucan extracted from some species of basidiomycetes fungi. It is obtained as a result of different processes such as fermentation from Shiitake mushroom, a type of mushroom known as Black forest mushroom or emperor mushroom in Southeast Asia, and a type of mushroom used and consumed only by the emperors in imperial Japan.

Who Can Use Active Hexose Correlated Compound?

Adults 11 years and older can use up to 3 grams per day.

Under 11 Can Children Use Active Hexose Correlated Compound?

There is not enough reliable information about the safety of using Active Hexose Correlated Compound in children under 11 years of age. Stay safe, do not use Active Hexose Correlated Compound in children under 11 years old.

Can Pregnant and Breastfeeding Women Use Active Hexose Correlated Compound?

There is not enough reliable information available about the safety of taking Active Hexose Correlated Compound if you are pregnant or breast-feeding. Stay safe, do not use Active Hexose Correlated Compound if you are pregnant or breastfeeding.

Can Those With Autoimmune Diseases Use Active Hexose Correlated Compound?

Active Hexose Correlated Compound has been reported to worsen autoimmune diseases. Therefore, the use of Active Hexose Correlated Compound is not recommended for people with Multiple sclerosis, systemic lupus erythematosus (SLE), rheumatoid arthritis (RA) or similar autoimmune diseases. If you have these or similar diseases, consult your doctor before using Active Hexose Correlated Compound.

Does Active Hexose Correlated Compound Interact with Compound Drugs?

● Drugs Receiving from the Liver

Some drugs are broken down and taken up by the liver. Some drugs derived from the liver (Cytochrome P450 2D6 (CYP2D6) substrates) may interact with Active Hexose Correlated Compound. If you are taking any medication that is broken down and taken by the liver, consult your doctor before using Active Hexose Correlated Compound.

● Immune Suppressants Drugs

Active Hexose Correlated Compound may interact with drugs that decrease/suppress the immune system. If you are using drugs that reduce / suppress the immune system, consult your doctor before taking Active Hexose Correlated Compound.
